

## SECTION 1 - IDENTIFICATION

**Product identifier/Trade name:** HW DET DISH DETERGENT, LT 500 DISH DETERGENT

**Other means of identification:** 0137077, 0137075, 0136075

**Recommended use:** Automatic Dish detergent

**Restriction on use:** For industrial, institutional and food plant use only.

**Initial supplier identifier:** CHANDLER  
225 Thorne Avenue,  
St John, NB, Canada E2L 4L9  
Phone: 1-800-363-9611

**Emergency phone number:** (613) 996-6666 (CANUTEC)

## SECTION 2 - HAZARDS IDENTIFICATION

### 2a GHS (Globally Harmonized System) classification

**This product is classified as:**

Metal corrosion: May be corrosive to metals- category 1  
Acute Toxicity: harmful if swallowed- category 4  
Skin Corrosion/Irritation — category 1B  
Serious eye damage/eye irritation — category 1

### 2b Label elements

**Pictogram**

**Signal Word :** Danger

**Hazard statements**

May be corrosive to metal  
Harmful if swallowed  
Causes severe skin burns and eye damage

**Precautionary statements**

Obtain special instructions before use.  
Do not handle until all safety precautions have been read and understood.  
Do not breathe dusts or mists. Wash hands thoroughly after handling. Wear rubber gloves, eye and face protection.

**IF SWALLOWED:** Rinse mouth. DO NOT induce vomiting. Immediately call a POISON CENTER or doctor.  
IF exposed or concerned: Get medical advice

**IF IN EYES:** Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTER or doctor.  
**IF ON SKIN:** Remove immediately all contaminated clothing. Rinse skin with water. Immediately call a POISON CENTER or doctor. Wash contaminated clothing before reuse.  
**IF INHALED:** Remove person to fresh air and keep comfortable for breathing. Immediately call a POISON CENTER or doctor.

**Storage:** Keep in a tightly sealed container in a well-ventilated room. Do not store on surfaces that may come into contact food products. **KEEP FROM FREEZING.**

**Disposal:** DISPOSE OF MATERIAL ACCORDING TO REGIONAL, PROVINCIAL AND FEDERAL REGULATIONS.

<b>SECTION 3 - COMPOSITION / INFORMATION ON INGREDIENTS</b>
---

Ingredients	CAS #	% (weight)	GHS CLASSIFICATION
Sodium hydroxide	1310-73-2	10-30	Skin Corrosion/Irritation Category, 1A Eye damage/Irritation Category, 1 Corrosive to metals Category, 1.
2-Propenoic acid homopolymer salt	9003-04-7	3-10	NA

The actual concentrations are withheld as a trade secret.

<b>SECTION 4 - FIRST AID MEASURES</b>
---------------------------------------

**4a Description of first aid measures**

**Eye contact:**

Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses if present and easy to do. Continue to rinse for at least 20 minutes. If irritation persists, continue rinsing. Chemical burns must be treated promptly by a physician. Immediately call a POISON CENTER or doctor.

**Skin contact:**

Rinse immediately contaminated skin for at least 20 minutes or more if necessary. While rinsing, remove all contaminated clothing, jewelry and shoes. Immediately call a POISON CENTER or doctor. Chemical burns must be treated promptly by a physician. Wash clothing before reuse. Clean shoes thoroughly before reuse.

**Inhalation:**

Remove person to fresh air and keep comfortable for breathing. Immediately call a POISON CENTER or doctor.

**Ingestion:**

Wash out mouth with water. Remove dentures if any. If material has been swallowed and the exposed person is conscious, get him to drink plenty of water to dilute product. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs spontaneously, the head should be kept low so that vomit does not enter the lungs. Chemical burns must be treated promptly by a physician. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

**4b Most important symptoms and effects**

The most important known symptoms and effects are described in the labelling (section 2b) and/or in section 11.

**4c Immediate medical attention and special treatment needed**

No data available.

## SECTION 5 - FIRE FIGHTING MEASURES

### 5a Extinguishing media

Suitable extinguishing media:

Water (if possible, avoid powerful sprays), foam, dry chemicals, carbon dioxide. Product itself is not flammable.

Unsuitable extinguishing media:

None known.

### Specific hazards for product

Hazardous combustion products:

Oxides of carbon, nitrogen, and other irritating gases.

### Special protective equipment and precautions for firefighters

Special fire-fighting procedures/equipment:

During a fire, irritating smoke and fumes may be generated. A self-contained breathing apparatus is required for fire-fighting personnel to protect themselves from irritating products produced during the combustion. Move containers from fire area if it can be done without risk.

## SECTION 6 - ACCIDENTAL RELEASE MEASURES

### 6a Personal precautions, protective equipment, and emergency procedures

Personal protection:

Avoid contact with eyes and skin. Use adequate aeration and ventilation. Floor will be slippery in case of a spill.

Use appropriate personal protection equipment (see section 8)

### 6b Methods and materials for containment and cleaning:

Stop the leak. For large spills, pump the product into drums or clean up spills using absorbent material. Resume cleaning by rinsing with water. Caution: floors will be slippery.

### 6c Environmental precautions:

Product is readily biodegradable but is corrosive. Do not let go to the sewers.

## SECTION 7 - HANDLING AND STORAGE

### 7a Precautions for Safe handling:

Avoid contact with eyes and skin. Wear rubber gloves, protective clothing and eye or face protection. Always add product to water. Use cold water to prevent excessive heat generation.

### 7b Condition for safe storage:

. Keep in a tightly sealed container in a well-ventilated room. Do not store on surfaces that may come into contact food products. KEEP FROM FREEZING.

**7c Special packaging materials:** Store in its original container made of polyethylene. Material may be corrosive to certain metals like aluminium among others.

## SECTION 8 - EXPOSURE CONTROLS AND PERSONAL PROTECTION

### 8a Control parameters

	Ontario Time-weighted Average Limit (TWA)	Ontario Short-Term Exposure Limit (STEL)	Notations
Sodium hydroxide	C 2 mg/m <sup>3</sup>	None established	

## 8b Engineering controls:

Provide adequate ventilation.

## 8c Individual protection measures

Respiratory Protection:

Not required under normal applications.

Respirator NIOSH/MSHA approved if large spill and lack of ventilation or if formation of mists.

Skin protection and other protective equipment:

Plastic or rubber gloves recommended. Protective clothing. Waterproof boots in case of spills.

Eye / face protection:

Eye protection or face protection.

General hygiene considerations:

**KEEP OUT OF REACH OF CHILDREN.** Avoid contact with eyes and skin. Never eat, drink, or smoke in work areas. Good hygiene is recommended after use of this product.

## SECTION 9 - PHYSICAL AND CHEMICAL PROPERTIES

Appearance and odor:	Liquid, Red
Odour threshold:	N/Av
pH:	≥13
Melting point and freezing point:	Approximately 0 °C
Boiling point:	Approximately 100 °C
Flash point:	None to boil
Evaporation rate (n-BuAc =1):	Approximately 0.4 (water)
Lower flammable limit (% by volume):	N/Av
Upper flammable limit (% by volume):	N/Av.
Explosion data - Sensitivity to mechanical impact:	Not sensitive
Explosion data - Sensitivity to static discharge:	Not sensitive
Vapour pressure (mm Hg)	Approximately 20 (water)
Vapour density:	Approximately 0.6 (water)
Specific gravity or density (water = 1 at 4 °C):	1.2 g/cm <sup>3</sup> @ 20 °C
Solubility in water:	Miscible
Partition coefficient – n-octanol/water:	Not available
Auto-ignition temperature:	Not available
Decomposition temperature	Not available
Viscosity:	<50 cps @ 77°F (24 °C)

## SECTION 10 - STABILITY AND REACTIVITY

### 10a Reactivity:

Not applicable when used as directed. It is incompatible with some materials, see below.

### 10b Chemical stability:

Stable at room temperature, in normal handling and storage conditions.

### 10c Possibility of hazardous reactions:

May react with strong acids, strong oxidizing agents and aluminium and other soft metals like zinc. When dissolving in water, heat is generated which could lead to spurting of the corrosive product if agitation is insufficient.

### 10d Conditions to avoid:

Avoid contact with strong acids, strong oxidizers and soft metals like aluminium, zinc, etc.

### 10e Incompatible materials

Strong acids, strong oxidizers, soft metals

### 10f Hazardous decomposition products:

With strong acids or oxidizers: heat, water vapors. With hypochlorite, toxic and irritant chlorine gas. With soft metals like aluminum.

## SECTION 11 - TOXICOLOGICAL INFORMATION

**Primary entry route(s):** Eye and ingestion.

**Eye:** Extremely corrosive product. May cause burns, irritation, redness, tears, burning sensation.

**Skin:** May cause severe irritation and burns on skin, necrosis of cutaneous tissues.

**Inhalation:** Corrosive product. Breathing high concentrations may cause headache, nausea, vomiting, dizziness and burns of respiratory tract.

**Ingestion:** Corrosive product. Violent pain in throat, mouth, gut, oesophagus and/or stomach perforation, collapse, possible death.

**Carcinogenicity:** Suspected of causing cancer. Risk of cancer depends on duration and level of exposure.

**Teratogenicity, mutagenicity, other reproductive effects:** No applicable information found.

**Skin sensitization:** Ingredients not sensitizing

**Respiratory tract sensitization:** Not available

**Synergistic materials:** Not available

**Other important hazards:** Not available

**Toxicological data:** The calculated LD<sub>50</sub> for this product is greater than 2,500 mg/Kg, oral, rat; our products are not tested on animals. However, for corrosive materials, the estimated toxicity is not relevant.

Ingredient	LD <sub>50</sub> (route, species)	LC <sub>50</sub> # hours (species)
Sodium Hydroxide	325 mg/kg (oral, rat)	Not available
2-Propenoic Acid Homopolymer salt	≥5000mg/kg (oral rat)	NA

For more details, refer to Section 3.

## SECTION 12 - ECOLOGICAL INFORMATION

### 12a Ecotoxicity :

TOXICITY (Fish)	Results	Exposure time	Method
Sodium hydroxide	Gambusia affinis 125 mg/L	96H	Not available
Éthylène diamine tetraacetic acid	114 mg/L	96H	Not available

TOXICITY (Daphnia)	Results	Exposure time	Method
Sodium hydroxide	40.4 mg/L	48H	Not available
Éthylène diamine tetraacetic acid	98 mg/L	48H	Not available

TOXICITY (Algae)	Results	Exposure time	Method
Sodium hydroxide	Not available		
Éthylène diamine tetraacetic acid	91.5-100 mg/L	72H	Not available

- 12b Persistence and degradability:** Product is readily biodegradable.
- 12c Bioaccumulation potential:** Not available
- 12d Mobility in soil:** There is no test data on this product.
- 12e Other adverse effect** No applicable information found

### SECTION 13 - DISPOSAL CONSIDERATIONS

Dispose of material according to regional, provincial and federal regulations.

### SECTION 14 - TRANSPORTATION INFORMATION

#### Transportation of Dangerous Goods:

UN number	UN3266
Proper shipping name:	Corrosive liquid basic, inorganic, N.O.S. (Sodium hydroxide)
Class:	8
Packing group:	II
Special case:	

### SECTION 15 - REGULATORY INFORMATION

#### In Canada

##### WHMIS information:

Product is regulated according to the *Hazardous Products Regulations* (HPR) in Canada. This product has been classified in accordance with the hazard criteria of the HPR and this MSDS contains all the information required by the HPR.

**WHMIS Classification:** See section 2a.

**CEPA information:** Ingredients are listed on the DSL inventory.

### SECTION 16 - OTHER INFORMATION

**Date of latest revision:** 2022-03-16
